

FormFox Release 2024.9: **November 14, 2024**

ENHANCEMENTS

- **FormFox Flex:** When performing FLEX collections, Formfox now validates the lot number entered by the user in order to improve accuracy.
- **Pre-Placement Exams:** The full examiner credentials now appear on FormFox Pre-Placement exam documentation.
- **Marketplace DOT Physicals:** For physical exams ordered in the Marketplace, clinics will now get paid faster when an exam is moved from Determination Pending to Incomplete by our utility service.

API CHANGES

- **API Validation for Marketplace Orders:** For customers placing API Marketplace orders, additional validation has been added to make sure that all the necessary information is present for the donor ID and company address in the contact information. **No code changes are necessary for API users.**
