**FormFox Release 2024.6:   July 18, 2024**

## ENHANCEMENTS

- **DOT Physical – Access to Information & History Tabs:** Previously, Collector/Administrator users who did not have "Allow Physical Exam Access" checked under their user account could not access the Information and History tabs of a DOT Physical. This has been corrected.

- **Reset Password or Restore Username Popup Changes:** This change provides better instructions for users that have exceeded the max number of login attempts. The instructions now read: "You have exceeded the maximum number of login attempts. Contact your site administrator to reactivate your account."

- **Changes to editing of donor information in FormFox:** Donor information entered by the ordering party will not be editable by FormFox users. For fields where an ordering party did not enter information, the FormFox user will be able to add that information.

- **Changes To the Non-clinical Blood Draw Workflow:** The existing non-clinical blood draw workflow has received a significant update adding instructions and tabs to improve the user experience.

- **New OHS service - Asbestos Physical Baseline:** FormFox has added the Asbestos Physical Baseline to its menu of Occupational Health Services that can be performed as an event capture.

## BUG FIXES

- **Remove error code from Billing Section:** In the Billing section grid of FormFox in the "notes" column some records have a pre-populated error.  This has been corrected.
