

RLSE0011159: WF 2.19.6 Release (v2.19.6)

Internal Release Notes

January 25th, 2024

WF Results Tab

1. STRY0097830: Phone Number field added Test Detail window to allow user to edit phone on existing orders up to the point of collection as needed.

WF Order Tab

1. STRY0096653: Lab Based Non-DOT Oral Fluid drug screens can be ordered in Workforce and displays the correct service on the authorization form.
2. STRY009764: Correct Regulatory Modalities display on the order page.
3. STRY0097644: Users can now select more than one test panel at a time when ordering Clinical tests.

WF Randomization Tab

1. STRY0098665: When uploading multiple roster pools from master, new pool members are added, and existing pool members included on the import template are updated to reflect the information on the template.
2. STRY0098272: New checkboxes in Pool Details added to indicate whether Portal Admin Only or Company Admin Only can run that pool.

WF Administration and My Information Tabs

1. STRY0096456: Allow users to select email as the mode by which they will receive the Security PIN that is sent when a Password reset is requested.
2. STRY0097487: Ability to exclude non-Marketplace clinics for Gen1 Pricing customers in Clinic Search Options.
3. STRY0097561: Master Portal option/button removed for Non-Portal Admin users when logging in.
4. STRY0097831: When Orphaned results are present in the Orphaned Results page, a number representing the number of results on that page will appear next to the tab heading to alert the user.
5. STRY0097832: "Additional Email" button removed from My Information page.

6. STRY0097064: Ability to Delete Role from User individually by company to revoke that User's access to that specific Company only and leave the user's access to other companies in place.
7. STRY0097833: Button previously labeled "Additional Phone" has been renamed to "Edit Phone Number" on My Information page.
