

RLSE0011189 Workforce 2.21

External Release Notes

March 28th, 2024

WF Results Tab

Workforce generated lab results letter displays drugs/analytes included in the panel as well as cut-offs.

WF Order Tab

Clinics enabled for non-regulated Oral Fluid lab-based collections can be searched for and selected from Order page, as well as from Site Search page.

WF Randomization Tab

Manager column added to Selection Inbox columns in Selection List and Selection Inbox.

Details for employees flagged as Managers no longer populate on Selection Inbox CSV Exports if not run by Portal Admin.

Test Event Details window from results grid indicates if the event was pre-ordered as part of a Random selection.

Account Number and Regulatory Mode are pre-populated properly when creating orders for Pending Alternate random selections.
